Figure S1: Scatterplots (left column) and Bland-Altman plots (right column) to assess correlation and agreement, respectively, between EUROLINE and ImmunoCAP ISAC in patients sensitized to the individual components on either test. 

- **A1: Ara h 1**
  - Scatterplot: $r_s = 0.76$, $p<0.001$, $n = 22$
  - Bland-Altman plot: $+1.96\ SD = 241.3$, $-1.96\ SD = -104.4$

- **B1: Ara h 2**
  - Scatterplot: $r_s = 0.93$, $p<0.001$, $n = 35$
  - Bland-Altman plot: $+1.96\ SD = 219.6$, $-1.96\ SD = 69.95$

- **C1: Ara h 3**
  - Scatterplot: $r_s = 0.91$, $p<0.001$, $n = 19$
  - Bland-Altman plot: $+1.96\ SD = 203$, $-1.96\ SD = 40.17$

- **D1: Ara h 6**
  - Scatterplot: $r_s = 0.86$, $p<0.001$, $n = 35$
  - Bland-Altman plot: $+1.96\ SD = 245.9$, $-1.96\ SD = -96.98$

$n = \text{patients positive on either test (performed in n=80)}$, $r_s = \text{Spearman's rank correlation coefficient}$
